We shape workplaces of the future

About PJ Production // PJ Production was established in year 1997, and has since the beginning designed, developed, and produced office accessory products for the modern working environment. We are an international company with big ambitions ready to optimize our customers' business, regardless of the size of the tasks. We truly believe that great service, consultancy, and reliable delivery are the key towards success. We determinedly take our collaborators' demands very seriously via reciprocal respect, ongoing dialogue, and quality-oriented solutions. And this exact combination supports our livelihood on a market with quality-consciously collaborators.

Besides the transparent collaboration, we make a virtue out of delivering high-quality products to our clients that fulfill the agreed standards and specifications. These high-quality standards and specifications are mandatory as we use internal quality-control. All inbound and outbound products are randomly controlled to ensure equal quality every time. Thereby, you can always expect to receive quality products from PJ Production – standard products as well as specially produced products.

Felt Drawer // Find more information on page 52-53

Did you know that more than 8.3 billion tonnes of plastic have been produced worldwide since the 1950s? And that 9% of this plastic has ended up in the world's oceans after the end of use time?

We have a burning desire to change this development, and turn waste into valuable products. That's why we designed this drawer. The felt is made of 70% upcycled plastic bottles from the oceans, which help us towards a better future where materials are recycled.

PEN TRAYS

BAMBOO PEN TRAY

X-SMALL & LARGE

Sustainability, durability, and versatility // With nature as inspiration combined with an ongoing environmentally awareness, bamboo became an attractive choice, since the material is the most environmentally-friendly resource to sustainability, durability, and versatility. Bamboo is widely perceived as an attractive alternative compared to other materials used in our existing portfolio due to its green growth, sustainable harvesting, and wood-like properties.

The design has taken functionality into consideration, since wires and cables discretely can be hidden through the two cut-outs in the back of the drawer. Additionally, unaffected by the version, the measurements of the designs have beneficial sizes, which makes them recommendable for the majority of all desks, - including depth 80 tables. The bamboo collection consists of two different sizes.

LAPTOP TRAY ATHENE

Modernizing, organizing, and optimizing // The working stations are getting smaller concurrently with an improved for storage removed from the surface of the desktops. While this development seems to continue, PJ Production has designed and developed a modernized version of our well-known Laptop Tray 2014 called Laptop Tray Athene. Laptop Tray Athene embraces the tendency with the smaller working environment, which makes the drawer recommendable for the majority of all desktops, - depth 80 tables included, due to the narrowed depth of 316 mm. The height and width are more or less comparable with Laptop Tray 2014 to ensure maximum capability in terms of storage of drawer blocks, a laptop, pencils, pens, personal belongings, among other things. The design of Laptop Tray Athene has taken overheated belongings into consideration, which has been solved with vent-holes in the back of the drawer. If even more vent is required, the majority of the back can be removed due to the perforations. Laptop Tray Athene is delivered with lock, as standard, whereas compartmentalized organization can be yours by the acquisition of a colour-matching insert. Furthermore, the drawer can be upgraded with a bamboo front to support the exclusivity. Yet it is noteworthy that this bamboo front is mainly project-oriented, - do not hesitate to contact us to hear more about the different possibilities.

SLIMTRAY

SMALL & LARGE

Simple, discreet, and functional // Our well-known Slimtray collection has a discreet look where no compromises have been taking regarding functionality. The collection consists of two attractive sizes, where both are available in two versions and three colors. Unaffected by the above-mentioned features, all versions are delivered with a plastic insert that easily can be removed if required. The design of the collection is relatively equal uninfluenced by the versions, where the only factor differs is the width, as the large has a width of 871 mm, whereas the small has a width of 426 mm. A factor similar for all productions is the discreet front of 32 mm, which gives a simple, elegant, and light expression at the workplace. Furthermore, the depth is likewise equal for all drawers, - 260mm, which makes the drawers recommendable for the majority of all desktops. Both sizes are available in two versions, - one with lock and one with a color-matching plastic cap. The plastic cap can easily be swapped with a lock afterward if this was not prioritized at first.

FELT DRAWER

SLIM & LARGE

Felt for the win // Did you know that since the 1950s, around 8.3 billion tons of plastic have been produced worldwide? Within the framework of this bad development, we have added value to waste plastic bottles, and turned these into essential products. The felt is produced by plastic bottles from the ocean containing a minimum of 70% recycled material. Meaning, the drawer has a sustainable aspect providing personality and authenticity.

The combination between the organic shapes, the modern expression, - while being opened and closed, and the sophisticated design with hidden sliders, are definitely remarkable features to highlight. Despite the discreteness, an instinctively powerfulness is occuring when furnishing with this felt drawer, - even at existing working environments. The Felt drawer exist in two versions slim and large. slim comes in a varation of colors; dark grey, light gray, blackish green and dark caramel.

CPU-HOLDER 2001

ORIGINAL & MICRO

A stable solution for the computer // PJ Production has a broad array of CPU-holders, which all have an elegant expression due to the simple construction. Our CPU-holder 2001 collection consists of two versions, - CPU-holder 2001 Original and CPU-holder 2001 – micro, which individually fits different sizes of computers. All two CPU-holders have height and width adjustments in order to keep the computer most carefully.

The collection maintains some add-ons such as swivel bracket and sliding/swivel bracket. These generate excellently access to the computer due to the full rotation recommendable for computers with USBs on top.

NEWLINE

A cheaper alternative // The Newline CPU-holder is a newer version of our existing CPU-holder 2001 collection. Thinner wall thickness and different production methods make the Newline a cheaper alternative, but definitely not a worse option! No compromises in terms of quality and design have been considered since PJ Production wants to ensure a high standard of products on the market.

Newline has two different installation opportunities: either by installing directly underneath the desktop or with the swivel mount. The last solution is an optimal choice if the table frame has a disrupting placement. The swivel mount is also recommendable if the USBs are placed on the top at the computer.

CPU-HOLDER

WALL MOUNTED

Maximize utilization of storage // Why only use the installation opportunity underneath the desktop, when the working environment has numerous other surfaces recommendable for installation. This CPU-holder must be mounted directly on the wall, which, besides space optimization, gives the employee full access to the working station without any disturbing factors.

The wall-mounted CPU-holder can carry up to 20 kg. Furthermore, the CPU-holder has width adjustment om 45 mm. – 160 mm., which makes it possible to use this CPU-holder for a broad array of computers unaffected by the size. The wall-mounted CPU-holder is available in two different colors, - black and aluminium, in order to match the existing interior at the office.

HORIZONTAL CPU-HOLDER

ORIGINAL & MICRO

Integrate the computer in the working environment // This CPU-holder is recommendable if looking for a horizontally mounted CPU-holder. The CPU-holder is directly installed underneath the desktop, which automatically integrates the computer within the working environment.

The CPU-holder is available in two different sizes, which gives a possibility of finding the perfect match unaffected by the size of the computer. Both sizes can carry a computer up to 20 kg., as well as height and width adjustment in order to modify the restrain the computer in place.

HORIZONTAL LAPTOP HOLDERS

EXTRA SMALL & MEDIUM

An open solution for laptop and docking station // This horizontal laptop holder from PJ Production is an affordable combination of a drawer and a CPU-holder. The collection consists of two different sizes, which must be installed directly underneath the desktop in order to have the laptop and docking station close by.

The advantage of both horizontal laptop holders is that they can be installed on the majority of all desktops – included desktops with a hardly placed table frame. Furthermore, the standard sizes can easily be changed in relation to a project-oriented assignment depending on the specific demands and needs. The two horizontal laptop holders have setting extraction as standard, which means that they can be extracted 370 mm. Additionally, both sizes have height adjustment on 70-140 mm. and are available in black, aluminium, and white, respectively.

FASTDOCK

A stable solution // If looking for a vertically mounted solution for a laptop and a docking station, then this FastDock is an excellent choice. The system must be directly installed underneath the desktop, simultaneously placing the personal laptop and docking station closer to the possessor. The level of clean desk caused by the placement is increased since the laptop and docking station is removed from the desktop. Lastly, the laptop and docking station are secured responsibly due to the enclosed safety strap.

HIDE AWAY

MULTI LAPTOP HOLDER

A smart two-in-one solution // Hideaway is the best choice, when you are looking for a solution to storage your laptop. This model keeps your laptop in a vertical position underneath the table. If you want access to your laptop, an easy function rotates the solution to a horizontal position, and Hideaway now works as an extra side table. The side table have a build in tray for storage of pens and other small items.

In horizontal position, the laptop is secured with a "safety belt".

CHAMBER

USBC & LAPTOPHOLDER

Easy and practical // As technology evolves, we are experiencing an increasing trend / demand for a smart and user-friendly storage of both portable and USBC Dock. We have therefore developed this "chamber", which is mounted under the desk, adapted to both small and large workstations.

Chamber is a solution that is easily accessible when you need to "plug" yourself and your laptop into the day's work. The USBC dock is attached and above is a small shelf where you slide your laptop in. Furthermore, there is a cable tie at the back and a small magnet to hold the stand on your USBC cord.

The holder fits a 15-inch laptop (W: 35 cm x D: 24 cm H: 1.8 cm) together with a dock, which has a width between 194 mm and 240. As well as a 13-inch laptop (W: 31 cm x H: 21 cm x D: 1.8 cm) and a dock which has a width between 164 mm & 215. However, you can always request other sizes and will be able to easily adapt to your needs.

MONITOR SOLUTIONS

FUTURE FLEX

FOR ONE OR TWO MONITORS

Embrace the clean desk policy // Tailoring the working space to be ergonomically friendly is essential in order to avoid work-related injuries. This issue is exactly what our new monitor system called Future Flex would like to solve by comfortability and availability. Future Flex has full 360 degrees rotation and can be tilted both directions. This combination creates a more productive and comfortable working position.

Future Flex consists of an elegant monitor pole in black, a mount, and the correspondingly amount of extension arms and VESA mounts. The system creates flexibility and fully utilization since the monitor pole is available in two versions: a centered through-desk mount or a centered desk clamp, depending on the preferences. Lastly, Future Flex embraces the clean desk policy, as the monitor pole has incorporated storage to reduce visible cables and wires behind the monitors and/or along the edge of the desktop.

WINGS

Expand your gaze // Wings is optimal if your are looking for a solution for a setup for three monitors.
Wings is situated on your desk on one monitor pole at the center and the screens is mounted on a horisontal pole. This gives you more space on your desk. Wings has full 360 degrees rotation, can be tilted both directions, and manually height adjusted. This combination creates a more productive and comfortable working position.

MONITOR POLE

FOR ONE OR TWO MONITORS

Let the client determine the final design // Looking for a monitor system that optimizes the space on the desktop – look no more. This Monitor Pole is recommendable for that purpose since the extension arms can be installed on both sides of the aluminium pole, and thereby preferable for the smaller working environments where space is minimized. Cables and wires are hidden from sight within the 30 cm. aluminium pole, which creates a clean desk expression in the working environment. Currently, the monitor pole is available at the height of 30 cm., but this can easily be adjusted depending on the specific demands. The aluminium pole can likewise be combined with monitor profiles to create a monitor rack for a self-chosen amount of monitors. Either way, you are more than welcome to contact us for a custom-made solution, because at PJ Production anything is possible, - and is it only the client that determines the final design.

MONITORARM

FOR ONE OR TWO MONITORS

An ergonomic correctly solution // This Monitorarm from PJ Production can be operated via gas springs, which provides a smooth height adjustment optimizing the workstation ergonomically. The system can either be bought for one monitor or two monitors, which both are produced in black powder-coated aluminium. Furthermore, the monitor system is delivered with two installation options, - desk clamp and through desk mount, both options included as standard.

The monitor system benefits ergonomic, since the monitors have full 360 degrees rotation and can be tilted 85 degrees up and 15 degrees down. Additionally, the cables and wires from the installed monitor(s) can easily be fitted to the Monitorarm with the included cable clamp.

ADD-ON

EXTENSION ARMS & VESA

If you would like to upgrade your monitor system // The monitor systems from PJ Production are built upon extension arms, which support a personalized working environment. If investing in a Monitor Pole one extension arm or a Future Flex with two extension arms, then these can always be upgraded with the preferred amount of extension arms.

When investing in an extension arm, you get the possibility of installing an extra monitor in the working environment as an improvement. However, be aware that the extension arm is excluding VESA mount, which can be found on the following page. Every extension arm comes in a package with two.

A VESA mount to the universal monitor // Monitor systems from PJ Production do always include a corresponding amount of VESA mounts. The monitor system can at any time be upgraded, which means that the amount of VESA mounts has to be upgraded as well. Our VESA mounts can be used til all monitors due to the measurements of both 75 x 75 and 100 x 100, which are the standard distances between the screw-holes. Furthermore, the VESA mount can be rotated, allowing easy positioning and safety in terms of the tilting adjustment, which provides the user the most ergonomically position.

CABLE SOLUTIONS

GAIA CABLE TRAYS

FIXED LENGTH

Create connectedness with the desk // There is hardly anything in the world that is more unpleasant than cables and wires in different colors and sizes along the edges of the desk. Additionally, these visible cables affect the indoor climate, since the dust easily gets caught in the mess, where the vacuum cleaner cannot get access to.

Fortunately, helps the GAIA Cable tray to overcome the issue with visible cables and wires with a simple, attractive, and professionally correct solution. The cable tray is available in two fixed lengths, - 115 cm. and 147cm.

3070-0103-9005 // 3070-0103-9006 // 3070-0103-9016

CABLE TRAY

FLEX

The perfect solution for the round table // If you are the owner of a round table, why see this as a limit? This flex cable tray is a perfect solution for round tables, since the cable tray can be shaped as the table. This means that the cable tray has two application opportunities: either by being curved or fixed. Either way, this cable tray is perfect for impoundment of cables and wires.

CABLE TRAY 2006

FIXED

A fixed, spacious solution // This cable tray is recommendable for working environments with a clean policy, since the wires and cables can be stored within the cable tray. The fixed and spacious cable tray is fitted underneath the desktop in order to minimize the visibility of the wires and cables. Additionally, the cable tie fastening holes can likewise be used to keep the wires and cable in order.

The fixed cable tray collection consists of four different sizes, which individually have a different amount of cable tie fastening holes. The shortest cable tray with a measurement of 40 cm. and has not centred fastening holes. The next size measuring 74 cm. has a single centred cable tie fastening hole. The two middle sizes, - with the measurements on 90 cm. and 115 cm., respectively, both have double centred cable tie fastening holes, whereas the longest cable tray measuring 147 cm. has three centred holes. Either way, all lengths can be delivered in three colours, - black, aluminum, or white.

FELT CABLE TRAY

74 CM., 115 CM. & 147 CM.

Stylish and functional design // We have a burning desire to transform waste into valuable products. One of the products produced from recyclable plastic is this cable tray. The felt is made from 70% upcycled plastic bottles.

With our new “Felt Cable Tray”, we have combined the best of previous cable tray solutions and combined it in a product that recycles waste material. Form has been in sharp focus during the development of the cable tray. The idea is minimalistic in order to reduce waste material, but at the same time no compromise has been made with function.

CABLE OUTLETS

SQUARED

Hide cables and wires discreetly // The tendency is that wires and cables take to much focus in the working environment due to the lack of hidden opportunities. This unwelcomed situation can, however, be solved with a cable outlet from PJ Production, where the wires and cables are hidden carefully in an elegant manner.

The manner in which the cable outlet is installed, is by making a size-costumed hole in the desktop where the cable outlet can be placed. These cables outlets have a squared shape – quadratic and rectangular, both with brushes in order to keep the cables and wires in place. PJ Production's assortment does likewise include round cable outlets, which can be found on the following page.

CABLE OUTLETS

ROUND

A cable outlet for your demands and needs // As mentioned previously, our cable outlet is available in a round design in numerous of materials. A black or white cable outlet in either ABS-plastic or steel look could be preferable if you are looking for a discreet look. A chrome cable outlet, on the other hand, could be a good choice if you are interested in a more risky statement. The majority of all cable outlets come in Ø60 and Ø80 mm., respectively. When the choice, regarding color and size, has been made, the cable outlet can be installed in an accustomed hole in the desk in order to hide cables and wires.

MO-CUP

This multifunctional cup-holder has to be experienced // National and international companies embrace the smaller, portable offices, including the clean desk policy, where the workplace is empty and ready for the next-coming working day. PJ Production has developed a new and innovative cup-holder that discretely can be installed underneath the desk. The solution is ideal for smaller offices, since the cup-holder generates a depositary removed from the desktops. Furthermore, when removing the cup from the desk, the problem with damaged computers due to spilled liquid, - especially coffee, will be decreased.

The cup-holder is named: MO-CUP, because of the multifunctional design. Besides the space for a universal cup, the cup-holder has an integrated holder for a phone in the front. The phone can be charged while being placed in the cup-holder due to the hole in the bottom of the design.

SACHEL HOOK

The perfect clean desk feature // The working environment is changing continuously, and the clean desk policy has never been more popular. Various of companies have chosen to integrate the policy as the customary in order to generate a more welcoming working environment with open-minded employees.

This satchel hook is attractive for the majority of all companies, especially those of whom that have integrated the clean desk policy, since the floor can be kept free from handbags that are flowing freely. The satchel hook is installed discretely underneath the desk to minimize the visibility when it is not being applied. Furthermore, the satchel hook can also be used to umbrellas or carrier bags to ensure that the floor is kept freely.

CABLE MANAGEMENT

80 CM., 120 CM., 160 CM. & 240 CM.

Easily and correctly storage of wires // Why be satisfied with wires and cables flowing along the edge of the desk, when these can be hidden and organized in an easy, simple, and correct way. The answer is a cable management sock from PJ Production. The cable management sock can easily be opened and closed without any tools, since the closing mechanism is a two-way zipper for total flexibility.

Additionally, the length of the cable management sock can easily be personalised due to Velcro, which can be used to extend the cable management sock with a shorter, longer, or similar cable management sock. Similarly, the diameter can be enlarged by connecting the chosen amount of cable management socks by using the zipper.

Currently, the cable management sock can be found in four different lengths in black. If you, however, are searching for a cable management sock in either light grey or white, do not hesitate to contact us to hear more about the possibilities.

SPECIAL SOLUTIONS

We love sitting down at the drawing board and designing new solutions. We are therefore happy to help you if you are in a situation that requires very special needs. In fact, PJ production was born out of a project where a special solution had to be developed. Since then, we have solved many special tasks, including multi-screen setups, specially designed drawers and larger setups for offices.

When we custom design, you are involved in the process from start to the end. Our industrial design engineer familiarizes himself with the needs of the target group, outlines and takes you on advice. The choice of materials is always of the highest quality.
